GoodWood Frames Ltd  
Traditional Timber Framer and  
Carpenter

The Beauty of nature transformed into your dream

GoodWood Frames

Traditional Timber Frames

Frames can be built on site or remotely and transported

Modern design meets traditional methods, this beautiful extension with kitchen and bathroom is clad in western red cedar with a striking zinc detail and a flat rubber roof.

We can build your frame at our workshop and transport it anywhere in the world. Rob has built frames in France, Scotland, Jersey and Northern Ireland.

# YOUR IMAGINATION- OUR SKILL

Bringing your dream to life, making ideas reality or just building from plan?

Then an affordable frame is only a phone call away.

Timber framed homes and extensions are comparative to other building methods, call us for a quote.

## ARCH BRACED TIMBER FRAME:

Hand made with traditional techniques, modern tools with timber chosen from a local saw mill. Driven by the clients vision, inspired by the historic arched brace truss. This project evolved before completion in order to fully meet the clients design, whilst maintaining structural integrity.

*The Frame before second fix*

*The completed frame*

## CONSERVATORY & STAIRCASE:

This conservatory replaced a upvc structure, the clients were thrilled with the light and texture of the new frame and the quality of the insulation making this a usable room all year round.

A staircase for renovation project, oak treads and painted soft wood stringers.

*Timber framed conservatory*

*Bespoke staircase for a high end renovation project*

## NO PROJECT TOO SMALL:

From a beautiful bed to a fire surround, we can build and design one off items of furniture including beds, tables, doors and stairs to name but a few.

*A beautiful bed, the head board is single piece of oak*

*A simple but striking fire surround*
